Subject: RE: GSDT Registration

Hi Connie,

There hasn't been an EN grant project looking at data exchanges with the GSDT, but there isn't really a need. Besides being a permit application tool, the GSDT is more of a document repository rather than a digital database. The GSDT saves all data and entries in document format (form data is converted to a PDF for submittal rather than being saved to a database).
A key point you should be aware of is that there is no reporting requirement to submit data to the GSDT for primacy states. 40 CFR 146.91(e) does require that Class VI applications, reports, and submissions in primacy states be submitted to EPA in an approved electronic format, but that format doesn't have to be the GSDT.

Feel free to reach out to me with any other GSDT, Class VI, or UIC data reporting questions.

Thanks,
Dan

Thank you Daniel,

Has any state developed an exchange network with the GSDT Tool?

After we go through the videos and review the account we may reach out about a demonstration.

Thanks Connie,

Got it. We will work on getting Albert set up with an account.

We have built in some flexibilities to the GSDT to accommodate state specific requirements, however it does have the limitation of being a "one size fits all" tool.

If you are interested in getting a live demonstration of the GSDT, please let me know and we can arrange it.

Subject: Re: GSDT Registration

We are applying for Primacy this summer, so if we receive an application right away the owner/operator and this office would use the GSDT Tool. However, we are currently developing an online permitting, inspection, and enforcement system and would want to establish network exchange capabilities with the tool. Our program will be collecting more data than the tool requires. For example, state rules require each permit to have an approved groundwater protection plan.

Thank you

Good morning Connie,

Is WV DEP considering using the GSDT for your Class VI applications once you get primacy? If so, we can set you up with preliminary permitting authority accounts.

We have a series of video tutorials online which may answer some of your questions:

Subject: GSDT Registration

We are trying to get to the screens in GSDT to complete bid specs for an online system that will include Class 6 wells being included in the Primacy update. Please process as soon as possible.

Thank you
